

*The **Theory** of*
Extuity

ABOUT

What Gravity was to Space, Extuity is to Time.

Where Newton revealed gravity and Einstein revealed relativity, an obscure connection between physics, biology and psychology reveals "extuity", a hidden mechanism that allows emotions to transcend time¹.

It is the ***first and only scientific framework*** that answers widely accepted yet unexplained human phenomena — *gut feelings, coincidence, love at first sight, deja vu, the Mandela effect...* — caused by measurable energetic interactions (psychologically translated into emotions) across time, similar to gravity acting across space. The Extuity Formula quantifies these connections, moving these experiences from mystery into testable science.
